FEATURES AND BENEFITS

The Herschel HAWAII WAVE is a designer freestanding patio heater that will add a touch of style and luxury to your outdoor entertaining area. With its 2kW high performance carbon lamp and outstanding quality stainless steel stand, in a black powder coated finish that incorporates hidden wiring for the perfect discreet design, the Hawaii Wave is suitable for both commercial and domestic outdoor environments. The Hawaii Wave features Herschel's long life, woven carbon fiber heating lamp which produces a high comfort heat and deep orange, no glare light, making it very pleasant to sit under. It can be easily turned on or off via the remote control (supplied) or on the heater itself.

This premium heater has a stylish, circular design that is ideal for ensuring 360 degree localized heat coverage and a contemporary, curved 78" pole. Hawaii Wave is easy to assemble and can be moved around to provide heat where you want it. Supplied with a 70" lead and 240V US plug, the lead is integrated into the pole and exits under the base of the stand.

In colder months and climates the heater is more effective under some form of cover and shelter from any wind.

The Hawaii Wave has high weather protection and is suitable for outdoor use all year round. The heater itself can be easily disconnected and from the pole if required for storage.

IMPORTANT

Please refer to the Hawaii Wave assembly instructions and the Herschel Hawaii heater Installation Manual before use and installation.

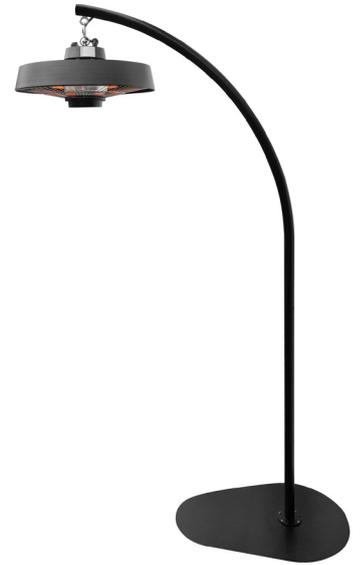

Suitable for outdoor use.

In exposed areas with air movement/wind the infrared spread may reduce by 1/3 to 1/2.

The Herschel Hawaii Wave is guaranteed against failure due to faulty materials or workmanship for two years. The warranty excludes the lamp and remote control. In the unlikely event of failure of the unit within this time, the unit must be returned to the supplier for repair or replacement. Refer to the warranty policy on Herschel-infrared.com for more detail including exclusions. The guarantee is invalid if the correct installation instructions have not been adhered to.

Ensure supply voltage does not exceed 245 Volts.
