

Beautifully finished, our Inspire range of heaters are the highest quality on the market and are available in a number of finishes ranging from white panels to picture and glass panels. Manufactured to the highest standards in Germany, they are designed and built to last a lifetime and come complete with a 10 year warranty.

INSPIRE MIRROR Far Infrared heating panels are an ideal addition to your bathroom, hallway or to the reception area or lobby of a corporate building.

The **INSPIRE MIRROR** heating panels can be placed in humid areas without any condensation forming on the mirror glass.

Due to the Far Infrared heating process, the mirrors heat up objects in the room rather than the air itself. This helps keep walls and furniture in humid areas dry and free of mould.

The Inspire panels are specifically designed to be maintenance free and to last for many years. For this reason, and to enable accurate temperature control and efficiency, the panels do not have any in-built controls and must be used in conjunction with the Herschel MD2 thermostat or equivalent.

TECHNICAL DETAILS

SURFACE: ESG mirror glass
COLOUR: -
REAR PANEL: Sheet steel, powder-coated, mounting points
SURFACE TEMPERATURE: Approx. 185°F - 203°F
VOLTAGE: 230V 50Hz
PROTECTION CLASS: IP54 (indoor use only)
INSTALLATION: Wall mounted
CERTIFICATES:
WARRANTY: 10 years
 (Refer to the warranty policy on Herschel-infrared.com for more detail including exclusions)

	SH-500	23.6 x 31.5 in	27.6lbs	550W	75-130ft ²
	SH-750	27.5 x 35.4 in	35.7lbs	750W	118-194ft ²
	SH-900	31.5 x 39.4 in	44.75lbs	900W	140-236ft ²
	SH-1200L	23.6 x 63 in	55.1lbs	1250W	183-312ft ²

The heated areas are an indicative guide only. The actual heated area will depend on the heat loss of the room which is influenced by many factors including construction type, external walls, window area and insulation levels. Always use the Herschel online calculator or contact your dealer or installer for an accurate specification.

The Inspire panel comes with two mounting brackets. When installed, the front of the panel will extend a total of 2" from the wall. The panel will radiate heat into the room and will perform best when mounted in a position free of any direct obstructions such as a sofa. The panel will need to be wired into the mains and this should be carried out by a suitably qualified electrician. Refer to installation instructions for full details.

6 REASONS WHY

- ✓ 100% natural
- ✓ Heats objects, not the air
- ✓ Less damp and mould
- ✓ Reduced energy use
- ✓ Maintenance free
- ✓ CO2 free when used with renewable energy
